# Win7下 NVIDIA Digits 安装配置

### 首先附上 NVIDIA 官方安装指导:

https://github.com/NVIDIA/DIGITS/blob/master/docs/BuildDigitsWindows.md

# 下面介绍按照官网安装遇到的坑以及解决办法:

- 1. 官网要求 Python2 版本是 2.7.11,而且不让用 Anaconda。但是在 Python 官网 (<a href="https://www.python.org/downloads/">https://www.python.org/downloads/</a>)下载 2.7.11 并安装之后在安装依赖包的时候会提示 各种找不到满足要求的包,笔者改用 Anaconda2(<a href="https://www.anaconda.com/download/">https://www.anaconda.com/download/</a>),在 Anaconda Prompt 上输入 python -version 显示 Python 2.7.13 :: Anaconda custom (64-bit);
- 2. 官网要求所需要的依赖包必须满足 requirements.txt 中的版本要求, 笔者发现没这么严格的要求, 除了 Flask 必须为 0.10.1 版本外, 其它的只需要直接 conda install 即可;
- 3. 在把 requirements.txt 中的包安装好之后再 conda list 一下看看 requirements\_test.txt 中的包有没有安装,如果没安装再 conda install 一下把 requirements\_test.txt 中的包也安装一下;

**注意**,如果把依赖的包都安装好之后出现类似如下这种错误,并且错误中有依赖的包的<mark>名字</mark>,请检查一下用 conda install 安装的包是否满足 requirements.txt 和 requirements\_test.txt 中要求的版本,如果不满足则重新安装指定版本的包一般问题就解决了;

Tensorflow support disabled.

## KeyError: 300

4. 在用 VS2013 编译好 pycaffe 之后要在系统环境变量中新建 CAFFE\_ROOT 或 CAFFE\_HOME, 其值为 caffe 的编译路径, 笔者的是 D:\caffe-master-Microsoft\Build\x64\Release;

5. 一般会遇到 "pkg\_resources\_vendor.packaging.version.InvalidVersion: Invalid version: 'CAFFE\_VERSION'"的错误, 找到 digits 安装目录下\DIGITS-master\digits\config\caffe.py,将其内容改为如下文件中的内容:

https://github.com/GarryLau/NVIDIA-Digits/blob/master/caffe.py

- 6. 如果出现 "cudaRuntimeGetVersion() failed with error #35" 的错误,一般是显卡驱动太旧了的原因,在 NVIDIA 官网(<a href="http://www.nvidia.com/Download/index.aspx?lang=en-us">http://www.nvidia.com/Download/index.aspx?lang=en-us</a>)下载一下相应显卡的最新驱动一般能够解决问题;
- 7. 官网说启动 digits 的时候用 python digits-devserver, 是错误的,应该用 python digits(或 python –m digits)
